## **ASSISTED LIVING CENTERS**

---

## **INTRODUCTION**

- On December 31, 2007, South Dakota had 159 assisted living centers with 3,665 licensed beds. In 2007, the rate of assisted living beds per 1,000 population aged 65 years or older was 24.8. Beds per 1,000 elderly persons aged 65 years and older can also be broken out by geographic area. Urban geographic areas had a rate of 39.3 beds per 1,000 elderly persons aged 65 years and older. Rural geographic areas had a rate of 30.9 beds per 1,000 elderly persons aged 65 years and older. Frontier geographic areas had a rate of 25.4 beds per 1,000 elderly persons aged 65 years and older.
- The 2007 Assisted Living Center Survey was completed by 155 of South Dakota's 159 assisted living centers. These 155 facilities reported 988,588 resident days during 2007.
- The 2007 average daily census for reporting assisted living centers was 2,716 residents per day and the occupancy rate was 76.2 percent.
- In 2007, reporting assisted living centers had 245,208 Medicaid resident days, which represents 24.8 percent of the total resident days provided by assisted living centers.

***NOTE:** It is particularly important to be able to compare the data from year to year. Therefore, when an assisted living facility does not submit a completed survey, the facility is still included when the report is talking about the number of beds and facilities. To include them in the report, current licensing numbers are used for extrapolation. When extrapolation occurs, the reader will know because the number is bolded, the area is shaded, and it is noted below the table. In addition, if the number impacts other numbers throughout the report, those numbers are also shaded to show that those numbers are based on extrapolated numbers.*

## RESOURCES

### Centers and Beds

The 2007 reporting period showed an increase in assisted living centers and beds, as have the past several years. On December 31, 2007, there were 159 assisted living centers with 3,665 beds. The number of centers providing assisted living increased by three facilities or 1.9 percent from 2006, and increased substantially by 44.5 percent since 1998. Table 32, below, tracks the growth in assisted living centers during the last 10 years.

In 1998, the number of assisted living beds per 1,000 population aged 65 and older was 19.7. Table 32, below, shows that the number of assisted living beds per 1,000 population aged 65 and older increased since 1998 to its 10-year high of 32.3 in 2007.

## UTILIZATION

Table 34, below, shows utilization trends for assisted living centers from 1998-2007. The table details resident days, average daily census, and occupancy.

Resident Days: Resident days in assisted living centers have fluctuated during the past 10 years. Responding centers reported a 10-year high of 988,588 resident days during 2007. Because there were non-reporting facilities, the total resident days and all the other utilization totals were under reported.

Average Daily Census: Responding centers reported that at any given time during 2007 there were about 2,716 people receiving assisted living care. Table 34, below, indicates that this number is up 294 residents per day or 12.1 percent from 2006 and up 1,318 residents per day or 94.3 percent since 1998.

Percent Occupancy: Responding centers report that the occupancy rate for 2007 was 76.2 percent. The occupancy rate increased by 8.9 percent from 2006.
